Tomatoes gene-edited to produce vitamin D could be a simple innovation to address a global health problem. Researchers at the United Kingdom’s John Innes Centre used gene-editing technology to turn ...

Gene-editing produces vitamin D

A new genetic discovery adds weight to a theory that motor neurone degenerative diseases are caused by abnormal lipid (fat) processing pathways inside brain cells. This theory will help pave the way ...

Gene discovery indicates motor neurone diseases caused by abnormal lipid processing in cells

A few months after getting the stop sign from the FDA, Homology Medicines is now able to restart its Phase II trial of a gene therapy for the rare metabolic disease phenylketonuria, or PKU. The FDA ...

Homology cleared to resume gene therapy trial for rare metabolic disease after FDA lifts hold

Thirteen genetic variants associated with disease in cats are present in more pedigreed breeds than previously thought, according to the largest ever DNA-based study of domestic cats, led by Heidi ...

Largest study of domestic cat DNA identifies disease-causing variants in new breeds

Affini-T Therapeutics & Metagenomi Announce Next-Generation Gene Editing Partnership to Advance Cell Therapies for Solid Tumor Patients

A significantly heightened risk of breast cancer has two well-known culprits—mutations to the tumor suppressor genes BRCA1 and BRCA2—but more than 40% of the time they are black-box “variants of ...
