Concise Pathology. With an emphasis on diseases most important to
clinical practice, the third edition of this resource presents an
understanding of pathogenesis as the foundation of clinical
knowledge.

Concise Pathology by Parakrama Chandrasoma

The study of pathology is traditionally divided into general and
systemic pathology, and we preserve this distinction. In the general
pathology chapters (Part A), the pathologic changes occurring in a
hypothetic tissue are considered. This idealized tissue is composed

Several types of pain occur in diseases of the extrahepatic biliary system. Biliary colic is severe intermittent pain in the right upper abdomen that radiates to the back and right shoulder. It is caused by increased muscular contraction of the bile duct and occurs when there is bile duct obstruction.

Chapter 44. The Extrahepatic Biliary System | Concise ...

Increased production of unconjugated bilirubin occurs because of increased breakdown of hemoglobin. Unconjugated bilirubin is complexed with plasma albumin and transported to the liver, where it is taken up by the liver cells for conjugation (Figure 25-1; see also Chapter 1: Cell Degeneration & Necrosis).Jaundice appears only when the amount of unconjugated bilirubin delivered to the liver ...

The novel coronavirus disease 2019 (COVID-19), caused by Severe Acute Respiratory Syndrome Coronavirus-2 (SARS-CoV-2), first appeared in December 2019, in Wuhan, China and evolved into a pandemic. As Angiotensin-Converting Enzyme 2 (ACE2) is one of the potential target receptors for SARS-CoV-2 in hu ...

Pathologic features of COVID-19: A concise review

At our medical school Robbins basic pathology is the recommended text and I was very skeptical before starting this book. But believe me this book is really nice and I excelled in my pathology class reading this text only. No robbins for me. This book is what it says- Concise, but also what it does not say- Relevant, succinct and crammable.
