Data Warehousing And Knowledge Discovery
Data Warehousing and Knowledge Discovery have been widely accepted as key te- nologies for enterprises and organizations to improve their abilities in data analysis, decision support, and the automatic extraction of knowledge from data. With the exponentially growing amount of information to be included in the decision-making process, the data to be processed become more and more complex in both structure and semantics.

Data Warehousing and Knowledge Discovery | SpringerLink
Introduction This book constitutes the refereed proceedings of the 14th International Conference on Data Warehousing and Knowledge Discovery, DaWaK 2012 held in Vienna, Austria, in September 2012. The 36 revised full papers presented were carefully reviewed and selected from 99 submissions.

This book constitutes the refereed proceedings of the 13th International Conference on Data Warehousing and Knowledge Discovery, DaWak 2011 held in Toulouse, France in August/September 2011. The 37 revised full papers presented were carefully reviewed and selected from 119 submissions. The papers are organized in topical sections on physical and conceptual data warehouse models, data warehousing design methodologies and tools, data warehouse performance and optimization, pattern mining, ...

Data Warehousing and Knowledge Discovery | SpringerLink
Data Mining, Data Warehousing, Big Data. Knowledge discovery is a process that requires a lot of data, and that data needs to be in a reliable state before it can be subjected to the data mining process. The accumulation of enterprise data within a data warehouse that has been properly validated, cleaned, and integrated provides the best source of data that can be subjected to knowledge discovery.
