After the Berlin Wall fell, scholars flocked to eastern Europe to
conductextensive opinion research on citizens' political attitudes
and values. Ineastern Germany, post-communist political elites were
found to differfrom western German politicians, exhibiting greater
distrust of bothpolitical parties and party discipline, more political
intolerance, a preference for economic equality over political
freedom, and support fordirect rather than representative
democracy. These attitudes wereexpected to be hurdles to
democratization. Becoming PartyPoliticians finds little evidence to

Tanja Tajmel entwickelt eine intersektionale Perspektive auf naturwissenschaftliche Bildung und Physikunterricht im Kontext von Migration und Mehrsprachigkeit. Ausgehend vom Recht auf Bildung und unter Einbeziehung sozial- und sprachwissenschaftlicher Ansätze argumentiert die Autorin analytisch-theoriebildend die Grundzüge einer ‚Reflexiven Physikdidaktik‘, deren Anliegen ein diskriminierungsfreier Zugang zu Bildung ist. Mit der Modellierung einer ‚kritisch-reflexiven Sprachbewusstheit‘ legt die Autorin die Grundlage für eine reflexive Praxis der schulischen Sprachbildung, die sie an Beispielen exploriert.

R&D, Innovation and Competitiveness in the European Chemical Industry explores the science & technology base and the dynamic performance of the European "system of innovation" in the chemical industry, with particular attention to its contribution to economic growth through innovation and competitiveness, and its ability to translate its research into commercially useful products. It also analyses the forces that encourage the diffusion of chemical innovations on downstream user industries and among large and small firms. The studies presented in this book represent an analysis of the issues and questions raised by the Green Paper on Innovation presented by the European Commission, for the specific case of the European chemical industry. R&D, Innovation and Competitiveness in the European Chemical Industry will be of interest to industry and government experts related to the chemical industry, scholars; both faculty and graduate students interested in growth, corporate strategy and the management of innovation.

Since unification German society and institutions have been challenged by various transformations and the need to adjust to changing conditions. While much has been accomplished, many political, legal, and institutional problems remain. This volume deals with selected aspects of domestic and European policy, political parties, the challenge of direct democracy, and federalism in unified Germany – all issues that have been the subject of much discussion, political posturing, legislation, and, to some extent, constitutional amendments and court decision for many years, if not decades. In conclusion, a British scholar looks at German federalism and a number of public policy issues from a comparative perspective and arrives at some surprising and encouraging results.

Analyzes the role of the non-Nazi German Right in the destabilization and paralysis of Weimar democracy from 1918 to 1930.

wisdom about modern German political history. An analysis of the decades-long struggle over memory and democracy shows how grassroots actors challenged and then took over public institutions of memorialization. In the process, confrontation of the Holocaust has been pushed to the centre of political culture. In unified Germany, memory politics have shifted again, as activists from East Germany have brought attention to the crimes of the East German state. This book delivers a novel and important contribution to scholarship about postwar Germany and the wider study of memory politics.
