Earth Science Geology, the Environment, and the Universe

Geology is the primary Earth science. The word means "study of the Earth." Geology deals with the composition of Earth materials, Earth structures, and Earth processes. It is also concerned with the organisms of the planet and how the planet has changed over time. Geologists search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

What is Earth Science? |

Geology.com

Environmental Earth Sciences is an international multidisciplinary journal concerned with innovative approaches and significant aspects of interaction between humans, natural resources or unique geographic zones, with

Earth Science Geology, The Environment and Universe ...

Geology is the study of materials that make up the Earth, the processes that form and change these materials, and the history of the planet and its life-forms since its origin. Oceanography is the study of oceans, which cover nearly three-fourths of the planet. Environmental science is the study of the interactions of organisms and their surroundings.
