Industry-Leading VMC Performance. Vertical machining centers from Methods offer best-in-class vertical milling capabilities for manufacturers handling high-speed machining, hard-to-machine materials, and heavy-duty cutting. Our VMC solutions are made with high-quality builder components, all designed to provide speed and stability that drives profits and ROI while also delivering accuracy and precision.

Vertical SIGMA FLEXI 3-/5-axis machining centers provide a movable work table on the X-axis and enable the highest precision and quality of machined workpieces. Motor spindles developed in-house cater for long service life. They deliver power output up to 33 kW, torque up to 235 Nm and speeds up to 19,000 rpm.

Vertical Machining Centers. High speed, high performance, and high load capacities to lower your cost per part. For a variety of machining needs, including high-speed, heavy-duty, and five-axis machining, Toyoda ' s complete line of vertical machining centers delivers lasting performance. Due to a vibration-dampening Meehanite cast iron base and large precision spindle bearings, we offer shops increased rigidity while sustaining higher load capacities.

PERFORMANCE / HIGH PERFORMANCE VERTICAL MACHINING CENTERS - GX / XR SERIES. The machines are built with 3 guideways and five blocks in the X & Y Axes and the 2 guideways of Z Axis have six blocks to enhance the rigidity and stability of the machine. Rapid traverse of 36m/min on the larger machine reduces idle time.

In the field of machining centers, KOAN CHO MACHINERY has earned reputations from worldwide valued clients. The Baron Max VB-1066 model has features Cost Effective, High Performance and easy maintaince. It is really ideal for machining solution.

~~Cost Effective High Performance Vertical Machining Centers ...~~

Accede evaluated numerous global machine suppliers in its search for high-performance technology. In 2008, representatives from Accede traveled to Japan to visit Makino ' s factory. They were inspired by the detail, care and engineering know-how that Makino ' s engineers demonstrated, which led Accede to invest in an F5 vertical machining center that would replace two of its commodity machines.

High Performance Vertical Machining Centers The F & KF Series Vertical Machining Center, designed by Hyundai WIA with years of expertise and using the very latest technology, maximizes productivity while maintaining rigidity and accuracy.

~~VERTICAL MACHINING CENTERS | HYUNDAI WIA | REVIEWS~~

The OKK VB53a vertical machining center is designed to minimize vibration and maximize accuracy for superior surface finishes for high-end die and mold applications and precision parts machining. In addition to its VCN and VC VMCs, Mazak offers its VTC Series of vertical traveling column machines, also manufactured in Kentucky.

The FV1480 is a heavy-duty vertical machining center that features four Y-axis box guideways, a Meehanite cast iron base, and a high-performance spindle. Toyoda AdvantageROI Justification MACHINE SELECTOR. FERROUS SPECS. Table Size. 61" x 31.5" (1,550 mm x 800 mm) X-Axis Travel. 55.1" (1,400 mm) Y-Axis Travel. 31.5" (800 mm)

~~Toyoda | FV1480~~

Key Features NV-series are New Generation of Campro Vertical Machining Center which model has more Y-axis and more working area to meet various application demands. Heavy-duty roller type linear guideways on 3 axes provide integration of heavy cutting ability from box way and fast movement ability from linear guideways.

L2 APC High Performance Machining Center The L2 vertical machining center is designed for high-volume, small-part manufacturing. Combining rigid construction, a compact footprint and flexible spindle design, the L2 offers a highly stable and reliable machine platform for fully unattended, around-the-clock part processing.

The Vertical Machining Center product offering from SMEC America includes both 40 and 50 taper models. Among the 40 taper offering is the value PCV 400 and their high performance line of MCV models. The MCV series ranges from the 400 which has 21.6" of X-axis travel up to the 82.6" travel offered by the 6700L.

Designed for High Speed and Highest Precision. Vertical Machining Center SIRIUS-UM+ features our made-by-Hwacheon spindles of 20,000 – 45,000rpm, providing the highest flexibility for parts requiring high speed and accuracy within microns with top quality surface finish. With a travel range of X / Y / Z (750 / 500 / 450mm), it provides superior technology, overall machine design and built.

~~Vertical Machining Center SIRIUS UM+ – Hwacheon Asia ...~~

High speed, high performance, and high load capacities to lower your cost per part. AQ850 The AQ850 is a high-speed vertical machining center featuring cylindrical roller guides, a Meehanite cast iron base, and a high-performance spindle. This machine maximizes cutting performance with rigid cuts and a powerful spindle.
