Discusses extraordinary dreams and offers suggestions for interpreting and appreciating your own extraordinary dreams. From visions of a past life to glimpses of the future, history is full of accounts of unusual dreams. This fascinating book explores historical, scientific, and cross-cultural research on these sorts of extraordinary dreams, and offers practical suggestions on how to work with them—either individually or as a member of a dream group—to enhance one's intellectual, emotional, and spiritual health. Each chapter is devoted to a particular type of dream, and presents a summary of research data on their nature. Specific categories of dreams discussed include creative, lucid, out-of-body, pregnancy, healing, collective, telepathic, clairvoyant, precognitive, past-life, initiation, and spiritual visitation dreams, as well as dreams within dreams. Entertaining and instructive, this book points the way to an expanded conception of human potential for the twenty first century. Stanley Krippner is Professor of Psychology at Saybrook Graduate School. He is the author of many books including, with David Feinstein, *The Mythic Path: Discovering the Guiding Stories of Your Past—Creating a Vision for Your Future*. Fariba Bogzaran is Associate Professor of Consciousness Studies and Founding Director of the Dream Studies program at John F. Kennedy University. She is the author of *Through the Light: An Exploration into Consciousness*. André Percia de Carvalho is a clinical psychologist and motivational speaker in Brazil specializing in the fields of human resources and industrial development.

Marcus Terentius Varro (116-27 BC) was the greatest polymath of the Roman republic. During his lifetime he authored several hundred books, and though many of them dealt with linguistic topics, the *De lingua Latina* ('On the Latin language'), the first large-scale linguistic treatment of Latin, was by far his most significant work. Originally consisting of twenty-five volumes - one introductory, followed by six on etymology, six on morphology, and twelve on syntax - only books 5-10 treating etymology and morphology have come down to us in a more or less complete form, though a fair number of fragments of other volumes have been transmitted in other authors. The present two volumes aim to provide a comprehensive treatment of this highly technical text in a new critical edition accompanied by a clear, accurate translation and full commentary. In Volume I, an introductory study outlines Varro's life and works, analysing his own linguistic usage and setting his insights about language in their historical and intellectual context. His etymology and morphology are contrasted with our own modern methods, yielding important and sometimes surprising insights into how an educated Roman looked at the history of his own language: although his etymology is, by current standards, pre-scientific, it is actually quite often in agreement with modern etymology, while his morphology also has much in common with a modern approach, focusing on the question of how regular language is and providing arguments against and in favour of regularity. Detailed discussions of these and other of Varro's linguistic ideas are brought to the fore in the exhaustive commentary in Volume II, which also sheds much needed light on the work's textual problems, cultural background, and distinctive Varronian style, and will be indispensable to scholars and students of both classics and linguistics.

THE STORY: Evan Wyler has just finished a photo session with his shirt off. No, he's not a supermodel; he's a twenty-something New York writer savoring the success of his debut novel. Defined by the media as the hot-young thing-of-the-moment, Eva

After discovering a corpse upon the Sinnikik Atoll, Moriah Lamb leads a team to hunt for other castaways, while Gage Carpenter begins the exploration of the ghost ship Derleth. But there's something down there in the icy darkness of the Arctic sea, something that doesn't want to be found. And it isn't any safer on land. There are things waiting for the search party in the mountain caves, things that were once human...and aren't quite anymore.
