the ability of a fabric to resist surface wear caused by flat rubbing contact with another material. Accelerator: A substance that speeds up a chemical process.

~~Polycoat Products Glossary of Technical Terms~~

The Polycoat™ PC-IM 129 System is a two component, liquid applied, asphalt extended aromatic polyurethane waterproofing membrane system. The system utilizes two coats of Polycoat™ PC-IM 129 with an optional polyester inner-ply mat. This system adheres to asphalt, concrete, wood and metal substrates.

~~Allylic~~ Polycoat Poly-fil® is a two component system where all the air is removed from the tire cavity and it is replaced with a liquid polyurethane rubber. The liquid in the tire cures at room temperature to a soft, resilient rubber that allows the tire to maintain the flexing characteristics of a conventional air filled tire.
