Reproduction in Farm Animals PDF Download. This objective is maintained in the seventh edition, which represents a condensed, concise treatise on the physiology and biochemistry of reproduction of farm animals. The book is divided into major sections and these, in turn, are loosely arrayed into two domains, the components of the reproductive system and the regulation of the reproductive process, from the control of ovulation to the initiation of parturition.

This chapter deals with spermatozoa and seminal plasma of male farm animals. Spermatozoa or sperm cells are formed in the seminiferous tubules of the testes. The seminiferous epithelium, lining the seminiferous tubules, is composed of two basic cell types: the Sertoli cells and the developing germ cells.
